PROFESSIONAL SUMMARY

Results-driven finance professional with a strong academic background in Hedge Funds & Alternative Investments. Experienced in financial analysis, risk management, and investment strategies. Adept at using Bloomberg, Python, and Power BI for data-driven decision-making. Seeking a dynamic finance internship to apply analytical expertise and strategic thinking.

PROFESSIONAL EXPERIENCE

Founder & CEO – Finexia (Startup FinTech / AI) Septembre 2025 – Présent

- Founded and currently leading Finexia, a fintech startup focused on AI-driven financial analysis, portfolio optimization, and advanced investment decision support tools.
- Designed and developed end-to-end financial models integrating quantitative finance, machine learning, and alternative investment strategies.
- Built proprietary tools leveraging Python, C++ and AI models for market analysis, forecasting, and risk management.
- Integrated Bloomberg-style workflows using professional data sources such as Refinitiv APIs for macroeconomic, equity, and FX data.
- Developed a scalable web application using React, Next.js, and modern backend architectures.
- Worked on algorithmic trading logic, portfolio construction, and performance analytics inspired by hedge fund strategies.
- Led product vision, technical architecture, and strategic roadmap while ensuring regulatory awareness and data confidentiality.

Budget & Financial Analyst – CA Bastia (Summer 2025)

- Assisted in the preparation and execution of operating and investment budgets.
- Designed and automated financial dashboards using Excel & Power BI.
- Streamlined internal reporting workflows with Power Automate.
- Contributed to multi-year budget planning and financial forecasting.
- Participated in the drafting of the Budget Orientation Report (ROB).

Finance Intern – Inessa Creations Monaco S.A.R.L., sustainable luxury award winner Monegasque brand (Feb – Jul 2024, Monaco)

- Conducted financial statement analysis, optimizing reporting processes and identifying key performance indicators.
- Assisted in cash flow management, helping optimize liquidity planning and ensuring financial stability.
- Developed financial models and forecasting tools using Power BI & Python, improving predictive accuracy for investment decision-making.
- Supported the business strategy team in assessing profitability and cost structures, providing key insights for optimizing investment portfolios.
- Collaborated with the finance team to ensure regulatory compliance and adherence to industry best practices.

International FX Trading Challenge – MSc Finance, International University of Monaco (2023)

- Designed and executed a profitable Forex trading strategy within a cohort of 62 MSc Finance students.
- Achieved a 73% profitability ratio vs 20–30% industry norm, with gross profits over \$1M on demo platforms.
- Strategy recognized by Professor Ben Robson as the best in years, highlighting strong risk management and investment decision-making skills.

Logistics & Administrative Coordinator – CHU Bastia (Summers 2020-2023, Bastia)

- Managed logistics and internal supply operations, optimizing stock control and reducing operational costs.
- Assisted in patient data management, ensuring compliance with administrative regulations and improving efficiency in hospital record-keeping.
- Strengthened customer service and effective communication in a fast-paced environment by assisting patients and coordinating with medical staff.
- Supervised inventory tracking and streamlined procurement processes to enhance supply chain efficiency.

Junior Member of Parliament – Haute-Corse, France (2008)

Elected at the age of 10 to represent Haute-Corse in the French Junior Parliament.
Presented at the Palais Bourbon (French National Assembly) a youth project on “Living Well Together”, fostering values of respect, inclusion, and civic responsibility.
Early exposure to leadership, public speaking, and project development, strengthening communication and teamwork skills from a young age.
